

NMR/MRI POSTDOCTORAL POSITION

New York University

A postdoctoral position is available immediately for an NIH-funded project on CEST NMR/MRI methodology development at NYU. NYU's research facilities include state-of-the-art high field MRI scanners and NMR and microimaging instrumentation. The lab is located in newly renovated facilities of the Molecular Nanoscience Center at NYU's Washington Square Campus in the heart of Manhattan.

Applicants should have an advanced degree (Ph.D) in Physics, Chemistry, or a related field, and should have experience with NMR/MRI theory and applications. The ideal applicant would also be familiar with computer programming and simulations. Experience with Bruker spectrometers/imagers and/or Siemens scanners would be a plus. Experience with chemical exchange and/or relaxation theory would be beneficial for the project as well.

Remuneration is competitive and commensurate with experience and will be based on New York University guidelines. Women and Minorities are encouraged to apply.
