

Position Available:
Postdoctoral Research Associate
Complex Carbohydrate Research Center
University of Georgia

The Prestegard Laboratory at the University of Georgia is seeking a candidate to fill a postdoctoral position focused on using NMR to characterize the structure and ligand specificities of glycan processing enzymes. The development and application of new NMR methods is an important component and the ideal candidate should have substantial experience in protein NMR and computer based modeling of protein structures. The University of Georgia has excellent NMR facilities, combined with a comfortable living environment. Please visit our website: <http://tesla.ccr.c.uga.edu/> for more information.

Interested candidates should send a cover letter describing their interests along with a cv and a list of three potential references to the address below **before July 1, 2013.**

James H. Prestegard
Professor and Eminent Scholar
Complex Carbohydrate Research Center
University of Georgia
315 Riverbend Rd
Athens, GA 30602-4712
706-542-6281
